I am trying to play it on Windows 10 but it constantly crashes :(The one and only time it managed to overpass the main menu was going unplayably fast without letting reducing the speed whereas all the other times that I tried to reduce the speed via options before beginning playing i was constantly kicked out when i was clicking to begin the game... :\/
I hope the issues are gonna be fixed orelse I spent my money on buying garbage :\/. Played this game before excellent game

just this time i'm unable to play it as it won't run. One of my favourite strategy games.
+old isometric graphic
+music
+hard (many missions you may finish in 2-10min if you know how do it or you fight 30-60min because you sart building and do technology and in the same time opponent create only army)
+multiplayer
+map editor creator (you may create army and without save the map go to battle and create your new army or opposite in the same time)
+colonial history of the Unitet States
+8 campaigns every with 5 missions

-only slow or fast mode (only fast work because on slow game crash and game is harder because on every attack of opponent you have 0-1s to response)
-workers AI
. (2019 post)

Just played this on Windows 10. Ran great even on 2560x1440.

Just had to set two install files to run in Windows7 Compatibility mode. DMCR and DMLN (both located in Steam Common File). Once set, Launch through steam, not through the application file.

You'll be getting slagheterd by indians before you know it.

Enjoy!. So much nostalgia from back then when I had a physical copy.

But sadly now, on newer OS things don't work like they should so I would not recommend it.
